UNIT PLAN – IV BHMS (OLD REGULATION) 2018-19

Unit	Topics	Hours
I	Introduction To Preventive and Social Medicine Concept, Man and Society:	17
	Aim and Scope of Preventive and Social Medicine	2
	Social Causes of Disease and Social Problems or the sick, Relation of Economic Factors	5
	Environment in Health and Disease	10
II	Physiological Hygiene:-	18
	Food and nutrition-food in relation to health and disease. Balanced diets. Nutritional deficiencies and nutritional survey. Food processing, pasteurization of milk. Adulteration of food and food inspection, Food poisoning.	15
	Air, Light & Sun-shine	1
	Effect of climate-humidity temperature, pressure and other meteorological conditions-comfort zone, effect of overcrowding.	1
	Personal hygiene - (Cleanliness, rest, sleep, work) Physical exercise and training care of health in tropics.	1
		20
III	Environmental Sanitation:	3
	Atmospheric pollution-purification or air, air sterilization, air borne diseases	6
	Water supplies-sources and uses, impurities and purification. Public water supplies in urban and rural areas. Standards of drinking water, water borne diseases.	4
	Conservancy- Methods in villages, towns and cities, septic tanks, dry earth latrines-water closets, Disposal of sewage, disposal of the deceased, disposal of refuse incineration	3
	Sanitation of fairs and festivals	2
	Disinfection - disinfectants, deodorants, antiseptics, germicides. Methods of disinfection and sterilization.	2
	Insects-insecticides and disinfection-insects in relation to disease. Insect control	2
	Protozoal and helminthic diseases Life cycle of protozoan and helminths, their prevention	15
IV	Medical Statistics	3
	Principles and elements of vital statistics	1
	Preventive Medicine	7
	General principles of prevention and control of communicable diseases, Plague, Cholera, Small Pox Diphtheria, Leprosy, Tuberculosis, Malaria, Kala-Azar, Filariasis, Common viral diseases e.g. Common Cold Measles, Chicken Pox, Poliomyelitis, Infective Hepatitis, Helminthic infections, Enteric fever, dysenteries and also animal diseases transmissible to man. Their description and methods of preventive spread by contact, by droplet infection by environmental vehicles, (water, soil food insects, animals, founderies, prophylaxis and vaccination.	3
	General principles of prevention and control of non-communicable diseases e.g. obesity, hypertension etc.	1

FORENSIC MEDICINE AND TOXICOLOGY

The subject is of practical importance to the students of homoeopathic medicine as homoeopathic physicians are employed by Government in areas where they may have to handle medico-legal-cases; perform autopsies, apart from giving evidence in such cases. The training in forensic medicine at present conducted is inadequate to meet these needs.

The course consist of a series of lectures and demonstrations including

1. **Legal Procedure:**

Definition of medical Jurisprudence. Courts, and their jurisdiction.

2. **Medical ethics:**

Law relating to medical registration and Medical relation between practitioners and the State. The Homoeopathy Central Council Act, 1973 and the Code of Ethics under it, the practitioners and the patients, Malpractice's covering professional secrecy, the practitioner and the various legislation's (Acts) Provincial and Union such as Workman's compensation Act, Public Health Act, Injuries Act, Child Marriage Registration Act, Borstal Schools Act, Medical Termination of Pregnancy Act. Lunacy Act, India Evidence Act etc.

3. **Forensic Medicine:**

Examination and identification of person living and dead: parts, bones, stains, etc. health, Medicolegal: putrefaction, mummification's, saponification, forms of death, causes, agencies,

Infant Care

Neonatal hygiene

Breast feeding

Artificial feeding

Management of premature child

Asphyxia

Birth injuries

Common disorders of new born

EXAMINATION

It will be conducted in III (Third) BHMS at the end of 2 years of Course of studying Theoretical and Practical aspects of Gynaecology and Obstetrics.

Eligibility for examination will include submission of 20 complete cases of different types (10 each in Gynaecology and Obstetrics).

Paper I: Obstetrics and Infant Care.

Paper II: Gynaecology.

Paper III: Exclusively for Homoeopathic Therapeutics.

PRACTICAL & CLINICAL EXAMINATION

The Examinee will take and present on case. The examiners shall stress on:

1. Comprehensive Case Taking.
2. Bedside training.
3. Adequate grasp over Diagnostics.
4. Adequate grasp over Management Principles.

COMMUNITY MEDICINE

(Including Health Education and Family Medicine)

Instructions in this course should be given in the Fourth year of medical studies by lectures, demonstrations and field studies. This subject is of utmost importance, and throughout the period of medical studies the attention of the student should be directed to the importance of preventive medicine and other measures for the promotion of positive health.

2775 GU/2003-17

PRINCIPAL

His function is not limited merely to prescribing homoeopathic medicines for curative purposes but he has a wider role to play, in the community. He has to be well conversant with the national health problems both in rural as well as urban areas, so that he can be assigned responsibilities to play an effective role not only in the field of curative but also of preventive and social medicine including family planning.

1. Introduction to preventive and social medicine concept, man and society: aim and scope of preventive and social medicine, social causes of disease and social problems of the sick, relation of economic factors and environment in health and disease.

2. Physiological hygiene:-

(a) Food and nutrition-food in relation to health and disease. Balanced diets. Nutritional deficiencies and nutritional survey. Food processing, pasteurization of milk. Adulteration of food and food inspection, Food poisoning.

(b) Air, light and sunshine

(c) Effect of climate-humidity temperature, pressure and other meteorological conditions-comfort zone, effect of overcrowding.

(d) Personal hygiene - (Cleanliness, rest, sleep, work) Physical exercise and training care of health in tropics.

3. Environmental sanitation:

(a) Definition and importance.

(b) Atmospheric pollution-purification of air, air sterilization, air borne diseases.

(c) Water supplies-sources and uses, impurities and purification. Public water supplies in urban and rural areas. Standards of drinking water, water borne diseases.

(d) Conservancy- Methods in villages, towns and cities, septic tanks, dry earth latrines-water closets. Disposal of sewage, disposal of the deceased, disposal of refuse incineration.

(e) Sanitation of fairs and festivals.

(f) Disinfection - disinfectants, deodorants, antiseptics, germicides. Methods of disinfection and sterilization.

(g) Insects-insecticides and disinfection-insects in relation to disease. Insect control.

KULASEKHARAM, KANYAKUMARI DISTRICT,
TAMIL NADU - 629 161

- (h) Protozoic and helminthic diseases Life cycle of protozoan and helminths, their prevention. ✓

4 Medical Statistics.

Principles and elements of vital statistics

Preventive Medicine

- (a) General principles of prevention and control of communicable diseases. Plague, Cholera, Small Pox Diphtheria, Leprosy, Tuberculosis, Malaria, Kala-Azar, Filariasis, Common viral diseases e.g. Common Cold Measles, Chicken Pox, Poliomyelitis, Infective Hepatitis, Helminthic infections, Enteric fever, dysenteries and also animal diseases transmissible to man. Their description and methods of preventive spread by contact, by droplet infection by environmental vehicles, (water, soil, food insects, animals, founderies, prophylaxis and vaccination.
- (b) General principles of prevention and control of non-communicable diseases e.g. obesity, hypertension etc.

Natural history of diseases.

5. Maternal and Child Health and health services, health education, mental hygiene- elementary principles: school medicine its aim and methods.
6. Family Planning - Demography, channels of communication, National Family planning programme, knowledge, attitudes regarding contraceptive practices. Population and growth control.
7. Public health administration and international health relation.
8. Homoeopathic concept of prophylaxis, vaccination, Immunology and personal hygiene.

N.B.: Field demonstration-water purification plant, infectious diseases hospitals etc.

GYNAECOLOGY AND OBSTETRICS

Instructions:

I (a) Homoeopathy adopt the same attitude towards this subject as it does towards Medicine and Surgery, but while dealing with Gynaecology and Obstetrical cases, a Homoeopathic physician must be trained in special clinical methods of investigation for diagnosing local conditions and individualising cases, the surgical intervention either as a life saving measure or for removing mechanical obstacles, if necessary, as well as their management by using homoeopathic medicines and other auxiliary methods of treatment;

(b) Pregnancy is the best time to eradicate genetic dyscrasias in women and this should be specially stressed. And students shall also be instructed in the care of new born;

(c) The fact that the mother and child form a single biological unit and that this peculiar close physiological relationship persists for at least the first two years of the child's life should be particularly emphasised.

II A course of instructions in the principles and practice of gynaecology and obstetrics and infant hygiene and care including the applied anatomy and physiology of pregnancy and labour, will be given.

III Examinations and investigations in gynaecological and obstetrical cases shall be stressed and scope of homoeopathy in this subject shall be taught in details.

IV The study shall start in Second B.H.M.S and shall be completed in Third B.H.M.S. and examinations will be held in Third B.H.M.S and following topics shall be taught, namely:-

Second B.H.M.S

A. Theory:

1. Gynaecology

(a) A review of the applied anatomy of female reproductive systems-development and malformations.

(b) A review of the applied physiology of female reproductive systems-puberty, menstruation and menopause.

SARADA KRISHNA HOMOEOPATHIC MEDICAL COLLEGE
KULASEKHARAM, KANYAKUMARI DISTRICT,
TAMIL NADU - 629 161

- (c) Gynaecological examination and diagnosis.
- (d) Developmental anomalies
- (e) Uterine displacements.
- (f) Sex and intersexuality.
- (g) General Management and therapeutics of the above listed topics in Gynaecology.

2. Obstetrics

- (a) Fundamentals of reproduction.
- (b) Development of the intrauterine pregnancy-placenta and foetus.
- (c) Diagnosis of pregnancy-investigations and examination.
- (d) Antenatal care.
- (e) Vomiting in pregnancy.
- (f) Preterm labour and post maturity.
- (g) Normal labour and puerperium
- (h) Induction of labour
- (i) Postnatal and puerperal care.
- (j) Care of the new born.
- (k) Management and therapeutics of the above listed topics in obstetrics.

Third B.H.M.S

1. Gynaecology

- (a) Infections and ulcerations of the female genital organs.
- (b) Injuries of the genital tract.
- (c) Disorders of menstruation.
- (d) Menorrhagia and dysfunctional uterine bleeding.
- (e) Disorders of female genital tract.
- (f) Diseases of breasts
- (g) Sexually transmitted diseases
- (h) Endometriosis and adenomyosis.
- (i) Infertility and sterility
- (j) Non-malignant growths.
- (k) Malignancy
- (l) Chemotherapy caused complications
- (m) Management and therapeutics of the above listed topics in gynaecology.

2. Obstetrics

- (a) High risk labour; mal-positions and mal-presentations; twins, prolapse of cord and limbs, abnormalities in the action of the uterus; abnormal conditions of soft part contracted pelvis; obstructed labour, complications of 3rd stage of labour, injuries of birth canal, foetal anomalies.
- (b) Abnormal pregnancies-abortion, molar pregnancy, diseases of placenta and membranes, toxemia of pregnancy, antepartum haemorrhages, multiple pregnancy, protracted gestation, ectopic pregnancy, intrauterine growth retardation, pregnancy in Rh negative woman, intrauterine fetal death, still birth.
- (c) Common disorders and systemic diseases associated with pregnancy.
- (d) Pre-natal Diagnostic Techniques (Regulation and Prevention of Misuse) Act, 1994.

- (e) Common obstetrical operations-medical termination of pregnancy, criminal abortion, caesarean section, episiotomy.
- (f) Emergency obstetric care.
- (g) Population dynamics and control of conception.
- (h) Infant care - neonatal hygiene, breast feeding, artificial feeding, management of premature child, asphyxia, birth injuries, common disorders of newborn.
- (i) Reproductive and child health care (a) safe motherhood and child survival (b) Risk approach -MCH care (c) Maternal mortality and morbidity (d) Perinatal mortality and morbidity (e) Diseases of foetus and new born.
- (j) Medico-legal aspects in obstetrics.
- (k) Homoeopathic Management and Therapeutics of the above listed clinical conditions in Obstetrics.

B. Practical or clinical:

Practical or clinical classes shall be taken on the following topics both in Second and Third B.H.M.S

- (a) Gynaecological case taking
- (b) Obstetrical case taking
- (c) Gynaecological examination of the patient
- (d) Obstetrical examination of the patient including antenatal, intranatal and post-natal care
- (e) Bed side training
- (f) Adequate grasp over Homoeopathic principles and management
- (g) Identification of Instruments and models

Record of ten cases each in gynaecology and obstetrics.

C. Examination:

1. Theory:

1.1 Number of papers - 02

1.2 Marks: Paper I-100; Paper II-100

1.3 Contents:

1.3.1 Paper-I: Gynaecology and homoeopathic therapeutics

1.3.2. Paper-II: Obstetrics, infant care and homocopathic therapeutics
